EXPERIENCE

BEARWORKS | SOFTWARE ENGINEER III

Nov 2025 - Present | Manhattan, NY

- Contributed to **AI CoachBear** platform development, implementing backend features and improving service performance and reliability.
- Built and integrated a **modal transcription service** using **Kyutai** models for real-time and batch audio transcription workflows.
- Performed **day-to-day bug fixes**, production issue resolution, and feature enhancements across backend and frontend services.
- Managed and monitored services on **Kubernetes** clusters using **k9s**, handling deployments, scaling, logs, and operational troubleshooting.

INOTECH | SOFTWARE DEVELOPER

Nov 2024 - Jan 2025 | RWP, Punjab

- Built scalable, containerized backend services using **Node.js**, **Express**, and **Docker**, orchestrated with **Kubernetes**.
- Developed AI-driven modules integrating **TensorFlow** for predictive analytics and real-time insights.
- Designed event-driven communication pipelines with **Apache Kafka** for reliable data streaming between microservices.
- Improved system resilience and performance through distributed tracing, load balancing, and horizontal scaling strategies.

ZAYTRICS | FULL STACK DEVELOPER

Jan 2023 - Nov 2024 | Islamabad

- Delivered responsive, high-performance web applications using **React.js**, **Next.js**, and **Material UI**.
- Architected microservice-based systems with **Node.js** and **Express**, integrated via REST and message queues.
- Containerized and deployed applications through **Docker** and **Kubernetes** with seamless CI/CD pipelines.
- Enhanced user experience by implementing server-side rendering, dynamic routing, and real-time updates across client interfaces.

PROJECTS

HMIS SYSTEM | HOSPITAL MANAGEMENT INFORMATION SYSTEM

- Built core hospital modules (HR, Payroll, Inventory, Accounts) using **Node.js**, **React**, and **Material UI**.
- Deployed via **Docker** and **Kubernetes** with role-based access and analytics dashboards.

HAY9 | CLOUD-NATIVE MONITORING SYSTEM

- Designed a Prometheus-like tool for metrics collection and alerting using **Node.js**, **Kafka**, and **React**.
- Deployed scalable clusters on **Kubernetes** with real-time visualization.

CHAMELEON | REAL-TIME VOICE CLONING PLATFORM

- Built RVC-based deepfake voice cloning with **TensorFlow** and **Next.js**.
- Enabled low-latency voice streaming using **WebRTC** and **Dockerized** GPU inference.

EDUCATION

BAHRIA UNIVERSITY

BACHELOR OF SCIENCE IN
COMPUTER SCIENCE

Cum. GPA: 3.4 / 4.0

SKILLS

PROGRAMMING

JavaScript (ES6+) • TypeScript • Python
• C/C++ • SQL • Bash

TECHNOLOGY

Docker • **Kubernetes** • **Apache Kafka** •
Nginx • **Redis** • **Linux**
CI/CD (GitHub Actions, Jenkins) • **AWS**
(EC2, EKS, S3, Lambda)

FRAMEWORKS & LIBRARIES

React.js • **Next.js** • **Material UI** • **Node.js**
• **Express**
TensorFlow • **PyTorch** • **Flask**

CONCEPTS

Microservices Architecture • REST /
GraphQL APIs • Event-Driven Systems
Containerization • Cloud-Native
Development • Distributed Systems

SOCIETIES

Google Developers Student Club (GDSC)
Youth Organization for Technical
Advancement (YOTA)

AWARDS

ACM ICPC 2023 finalist
AWS Academy Graduate
Dean's Honour List
