EXPERIENCE

VISION TECH 360 | IOS DEVELOPER

Jan 2023 – Nov 2024 | RWP

- Built AI-driven iOS apps using Core ML and TensorFlow Lite for on-device inference with sub-100ms latency.
- Deployed ML pipelines via AWS SageMaker to improve predictive accuracy by 27%.
- Integrated NLP and Computer Vision modules, reducing manual data entry by 40%.
- Optimized deep learning models with quantization, cutting size by 65% while retaining accuracy.
- Developed SwiftUI dashboards to visualize real-time IoT telemetry with <1s refresh rate.

INOTECH SOLUTIONS | SR. AI ENGINEER

Nov 2024 – present | RWP

- Developed Retrieval-Augmented Generation (RAG) apps using custom-trained LLMs with 4-bit quantization and LoRA fine-tuning, achieving a 60% reduction in memory usage.
- Designed server-client architecture with React Native front-ends and Python inference servers, ensuring <200ms latency for AI responses.
- Engineered real-time voice cloning software with mobile-based hooks, leveraging server GPUs to synthesize cloned speech during live calls.
- Implemented distributed pipelines using AWS, Apache Kafka, and Docker for scalable streaming, model deployment, and multi-session context management.

PROJECTS

INTELLIDOCs RAG PLATFORM | LEAD DEVELOPER

2024 – Present | RWP

- Built RAG system with custom LLMs (LoRA, 4-bit), scaling to >10M documents.
- Deployed AWS + Kafka pipelines with K8s inference APIs.
- Delivered iOS (Swift) app with sub-200ms query latency.

REAL-TIME VOICE INTELLIGENCE | LEAD DEVELOPER

2023 – 2024 | RWP
