

*** Under this arrangement, the Service Provider shall allocate dedicated technical and managerial personnel to the Project for the execution of the defined scope. All resources shall perform services in accordance with agreed practices, applicable standards, and the Organization's technical and operational requirements. The Service Provider shall retain administrative and employment responsibility for the assigned personnel while ensuring continuity, performance oversight, and compliance. Compensation for the resources shall be fixed on a monthly basis as outlined below and shall constitute the full consideration for the services rendered. ***

Role	Scope of Responsibility	Monthly Cost (PKR)
Technical Team Lead / Solution Architect	Technical governance, system architecture oversight, delivery leadership, and risk management	320,000
Senior Systems Engineer	Core backend architecture, API design, data modeling, and system scalability	220,000
Frontend Application Engineer	Advanced UI engineering, performance optimization, and design system implementation	200,000
Backend Application Engineer (I)	Business logic implementation, service orchestration, and integrations	180,000
Backend Application Engineer (II)	Backend feature development, optimization, and maintenance	180,000
Total Monthly		1,100,000 PKR
